

Olinda Trail North

Described as off-road trail connection as part of Washington County Linear Park System Plan

Route:

This trail intersects the east- west Washington Greenway. It extends north-south through New Scandia Township from Chisago County to County Road 4 south of the township.

Length: 6 ½ +/- Miles

Status:

Listed as intention to complete by 1995 in Washington County Linear Park System Plan. See “Issues” below.

Issues: An off-road trail along this corridor was defeated in its first referendum. Feasibility for this trail connection, even as an on-road bicycle route or lane, should be reevaluated as conditions and/or circumstances evolve.

Opportunities: If realized, this proposed trail offers a direct connection to the proposed Swedish Immigrant Trail and the communities of Lindstrom and Chisago City. There is merit to review this opportunity again with a campaign to increase public awareness of the potential trail benefits in this corridor.
