

Washington Greenway

East- west 'ribs' or collector trails of Washington County Linear Park System Plan

Route:

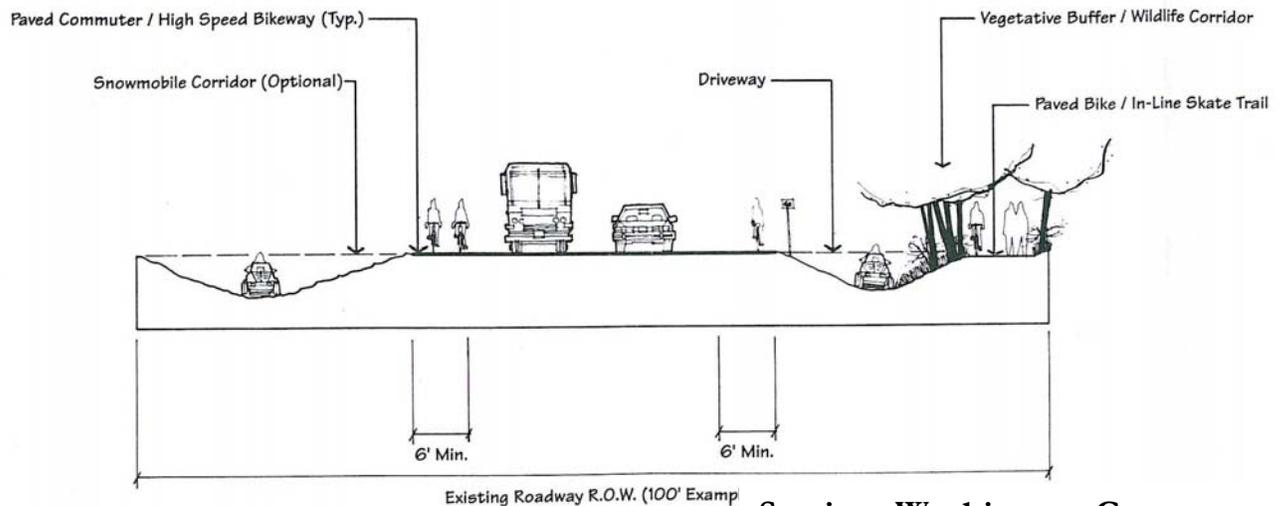

This trail would intersect Washington Parkway, improving bicycle access to county, state and local parks, local trails within the county and beyond. It extends east- west through New Scandia Township from CSAH 15 (Manning Avenue) and continuing on County Road 52.

Length: 6+/- Miles

Status:

County Road 52 complete

Section- Washington Greenway
Courtesy Washington Co.- Not to Scale

Issues:

- Bicyclists/ pedestrians risk dangerous existing conditions by sharing roadway with vehicular traffic

Opportunities:

- Washington County has identified the Washington east-west Greenway to include two six- to eight-foot paved shoulders for bicycling and one detached paved path for bicycling and inline skating
- Trail could serve as 'short-cut' from William O' Brien State Park to Village Center
- Potential to take advantage of underutilized township parcels adjacent to proposed trail (e.g. Oakhill Road & Hwy 97) to provide rest areas
- Opportunity to promote Village Center businesses
