

## Washington Greenway

North- south collector trail of Washington County Linear Park System Plan

### Route:

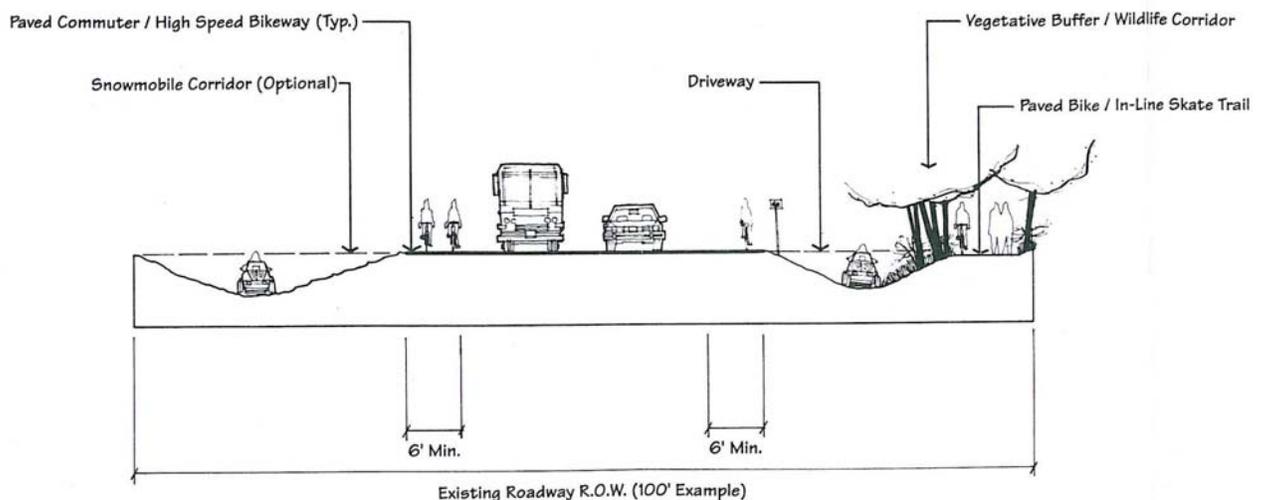

This trail would intersect Washington Parkway, improving bicycle access to county, state and local parks and trails. This greenway extends north-south through New Scandia Township along its eastern edge from Chisago County to the community of Marine-On-St. Croix.

**Length:** 6 ½ +/- Miles

### Status:

Proposed.

### Issues:

- Separated state trail east of State Highway 95 is currently in disrepair and ends abruptly at State Highway 97
- Corridor is located along St. Croix Scenic Byway, part of National Scenic Byway system

### Opportunities:

- Washington County has identified the Washington north- south Greenway to include two six- to eight-foot paved shoulders for bicycling and one detached paved path for bicycling and inline skating
- Emmons & Oliver study recommends reuse of this corridor as potential location for Gateway Trail extension
- Opportunity for collaboration between state, county and township
